--	---

This document presents a personal and detailed record of the main symptoms, experiences, and complaints that I experience and associate with what I identify as...**V2K/RNM (Voice 2 Skull and Remote Neural Monitoring)**...including involuntary internal dialogues, a feeling of interference with thoughts and attention, sleep disturbances, anxiety, physical discomfort, mood swings, and difficulties performing daily activities such as working, studying, resting, and maintaining productivity. I believe my entire family suffers as well. **Victims often identify themselves by the term "Targeted Individual".**
